

Dayanand Medical College & Hospital Ludhiana

PRELIMINARY ANNOUNCEMENT

Medical Council of India
Platinum Jubilee Year Symposium-cum-Workshop

Trends in Medical Education: Role of Information Technology

Information technology (IT) has revolutionized science and technology over the last few years. The advances in IT also bring new challenges to medical education. We need to enhance our learning and teaching environment by integrating IT as a central component in our medical curriculum.

As part of the Platinum Jubilee Year of MCI, we are organizing a symposium-cum workshop on "*Trends in Medical Education: Role of Information Technology*" on 27th September, 2008.

The symposium-cum-workshop will be of great benefit to faculty members from medical/dental colleges. There is no registration fee for the participants. The scientific programme is enclosed. Online registration form is available on the website home page www.dmch.edu. In case of any query, please contact Dr. Gautam Ahluwalia, Organizing Secretary on email id: **ahluwaliagautam@rediffmail.com**

Dr. Daljit Singh
Principal
