Elective Module: Wound Care

Wound care Training is a specialized form of surgical training that focuses on developing the skills necessary to wound care. This type of wound care involves different type of dressing and debridement wound care training is an essential component of general surgery education, as it provides medical students with the opportunity to develop the technical skills and cognitive abilities required for wound care management.

Chronic wounds are highly prevalent and have become public health crises. Successful treatment of chronic wounds requires that health care providers study both the patho-physiology of wound healing and maintain knowledge of the most current wound care guidelines set forth by the Agency for health care Research and Quality. Unfortunately, medical students currently limited wound care training. A focused and well-Organized course integrating a diverse group of medical and surgical faculty, residents and medical students in the clinical years has been created to curricular innovations is to help future physician gain exposure to chronic wounds and develop crucial clinical skills so they enter residency prepared to offer basic treatment and prevent rapid deterioration of may wounds they will encounter.

By the end of elective, participation are expected to be adept in surgical etiquette and conduct, develop competence in basic surgical skills like role of as daily dressing and wound debridement.

This elective module will enable students to navigate skill building in general surgery and encourage them to pioneers in their future endeavors.

Name of Book	Block -II
Name of Elective	Wound Care
Location of hospital Lab or research facility	Deptt. of Surgery
Name of internal preceptor (s)	Dr. Sanjeev Kumar Singla
Name of external preceptor (if applicable)	-NA-
Learning objectives of elective	a. Define wound care b. Illustrate indication of wound care c. Illustrate types & classification of wound d. Discuss the management & types of wound e. Understanding the warning signs & complication of wound infection
Number of students that can be accommodated in this elective	4
Pre-requisites for elective	
Learning resources for students	a. Bailey & Love's Short Practice of Surgery, b. Sabiston Textbook of Surgery c. SRB's Atlas of Tissue Approximation with Suturing & Knotting with Video Demonstration d. Pub Med user guide e. The Medical Research Handbook
List of activities of student participation	a. To observe dressing procedure b. To practice activity in ward
Portfolio entries required	
Log book entry required	Satisfactory, completion procedure
Assessment	a. Attendance b. Completion of procedure
